NANAVATI MAX Super Speciality Hospital

Nanavati Super Speciality Hospital

Nanavati Max Super Speciality Hospital has been at the forefront of healthcare for 70 years. Today the 350-bed facility housing, 55 speciality departments offers a plethora of services in practically every field of modern medicine and healthcare. Our well-equipped hospital rooms, state-of-the-art departments and technologically advanced systems are all backed by the expertise and reputation of more than 350 consultants, 100 resident doctors, 475 nursing staff and 1500 employees.

Vision

To create a patient-centric tertiary healthcare organisation focused on non-intrusive quality care utilizing leading edge technology with a human touch.

Mission

- Achieve professional excellence in delivering quality care.
- Push frontiers of care through research and education.
- Adhere to national and global standards in healthcare.
- Ensure care with integrity and ethics.
- Provide quality healthcare to all sections of society.

Our Specialities

- Cancer Centre: Medical, Surgical and Radiation
- Institute for Bone, Joint Replacement, Orthopaedics, Spine and Sports Medicine
- Centre for Critical Care
- Centre for Hepato-Pancreatic-Biliary Surgery & Liver Transplant
- Heart Institute
- Centre for Neurosciences
- Centre for Child Health
- Centre for Chest and Respiratory Diseases
- Centre for Urology
- Centre for Plastic, Aesthetic & Reconstructive Surgery
- Centre for Nephrology and Kidney Transplant
- Centre for Obstetrics & Gynaecology
- Centre for Haematology & Bone Marrow Transplant
- Dept. of General & Minimal Access Surgery

- Dept. of Ophthalmology
- Dept. of Dental Surgery & Implantology
- Dept. of Internal Medicine
- Dept. of Anaesthesia & Pain Management
- Dept. of Transfusion Medicine (Pathology)
- Dept. of Laboratory Medicine
- Dept. of Radiology
- Dept. of Physiotherapy & Rehabilitation
- Dept. of Bariatric Surgery
- Dept. of ENT Surgery
- Dept. of Vascular & Endovascular Surgery
- Dept. of Dermatology
- Dept. of Endocrinology
- Dept. of Mental Health (Psychiatry, Psychology)

Our Infrastructure

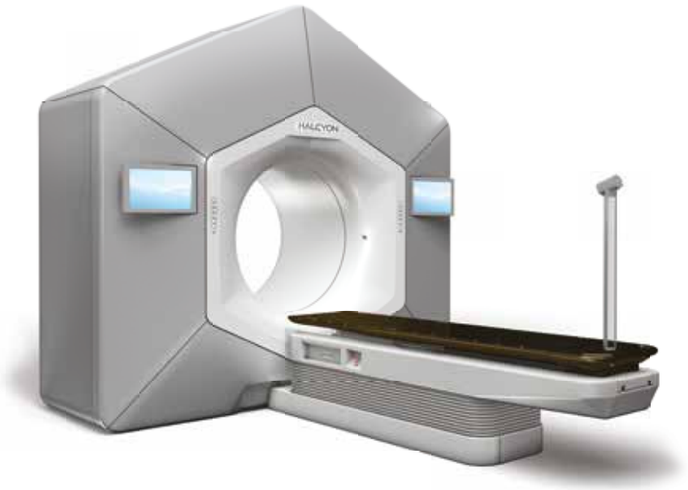

For over 70 years, Nanavati Max Super Speciality Hospital has always been a leader in adopting the latest technologies in healthcare delivery in order to continuously enhance patient services. The hospital's advanced Imaging Centre, spanning over 10,000 sq. ft, houses a 3 Tesla 32 channel wide bore Magnetic Resonance Imaging (MRI) scanner with MR guided focused ultrasound (MRgFUS) and High Intensity Focused Ultrasound (HIFU), a 64-slice Positron Emission Tomography–Computed Tomography (PET CT) with cardiac capability, a 4-D ultrasound sonography machine, Bone Mineral Densitometry, Mammography, Automated Breast Volume Scanning (ABVS) equipment and Digital X-rays.

The Out-Patient Department (OPD) at Nanavati Max Super Speciality Hospital with its state-of-the-art medical facilities, stretching luxuriously over 75,000 sq. ft., reflects the hospital's ongoing commitment to providing patients with world-class services and technology.

The Hospital has 12 state-of-the-art well equipped modular operation theatres with three-stage air filtration and gas scavenging system to ensure patient safety. All the Operation Theatres are fitted with best-in-class pendants, operating lights, anaesthesia work stations and advanced information management systems. The infrastructure speaks volumes about Nanavati Max Hospital's commitment to 'PASSION FOR HEALING'.

Our State-of-the-art Equipments

- **Imaging Centre –** The hospital's state-of-the-art Imaging Centre spans over 10,000 sq. ft, houses a 3 Tesla 32-channel wide bore MRI scanner with MRgFUS and High-Intensity Focused Ultrasound (HIFU), a 64-slice PET CT with cardiac capability, a 4-D ultrasound sonography machine, Bone Mineral Densitometry, Mammography, ABVS equipment and Digital X-rays.
- **Robotic Surgery System –** Advanced surgical intervention for CTVS, ENT, General Surgery, GI Surgery, Gynaecology, Transplants, Urology and Oncology.
- **Computer Navigation System –** India's first pain-free Computer Assisted Navigated Surgery for Joint Replacement.
- **Halcyon –** Next generation Image-guided Intensity-Modulated Radiation Therapy; India's first and most advanced system for Cancer treatment; more precise and effective; 3D Image guidance; faster treatment delivery.
- **Cath Lab –** The Catheterization Lab at Nanavati Heart Centre is the first of its kind in Mumbai. It is a unique and dedicated institution of Cardiac Care, which has achieved a perfect blend of clinical excellence and aesthetic ambience. The department has a team of highly experienced and qualified faculty providing 24x7 Interventional Cardiac Services.
- **Nuclear Medicine –** The hospital has a first of its kind dual-head Single-Photon Emission Computerized Tomography (SPECT CT), with a variable angle gamma camera. This enables doctors to trace physiological pathways early in the disease process in a non-invasive manner.
- **Endoscopy Suites –** India's first dedicated Endoscopy Suite for endoscopic ultrasound and other advanced endoscopic procedures like ERCP, Stenting, UGIE, Colonoscopy, etc.
- **Blood Bank –** A state-of-the-art Blood Bank meeting all standards has been set up with facilities like Apheresis, Blood Component Separation and Stem Cell Harvesting. The Blood Bank is equipped with the NAT (Nucleic Acid Testing) System for the screening of blood to ensure the safest possible blood for all patients.
- **Laboratories –** Hospital has one of the most well equipped and NABL accredited labs in the city for the entire gamut of diagnostic services in Haematology, Biochemistry, Microbiology, Molecular Biology and Histopathology.
- **Mammography –** Low radiation digital imaging and stereotactic (3D) biopsy system.
- **Bone Mineral Density (BMD) –** Whole Body BMD scan capable of giving instant reports.
- **Dental Facilities –** Nanavati Max Hospital has fully integrated and automatic dental chairs complemented by low radiation and high precision digital X-Ray & CBCT.
- **Ambulance Services –** The hospital has a fleet of Ambulances fully equipped with Advanced Life Support System for all kinds of emergencies.

Institute for Bone, Joint Replacement, Orthopaedics, Spine & Sports Medicine

Institute for Bone, Joint Replacement, Orthopaedics, Spine & Sports Medicine is a part of Nanavati Max Super Speciality Hospital – one of India's largest quaternary care hospitals. The Centre focuses on the most recent techniques in joint replacement, spine surgery, sports injury and trauma care. The Centre is ably supported by world-class physiotherapy and rehabilitation unit for post-surgical care.

The Centre for Orthopaedics and Joint Replacement is organised in various sub-specializations for the treatment of disorders of the musculoskeletal system (muscle, bones & joints). The hospital offers dedicated services for Trauma and General Orthopaedics, Spine Surgery, Sports Medicine and Joint Replacement including Minimally Invasive Surgery (MIS) for Total Knee Replacement, Total Hip Replacement, Hip Resurfacing, Unicondylar (Partial) Knee Replacement as well as Replacement of Shoulder and Elbow joints. The Centre regularly carries out arthroscopic procedures for sports and other injuries, limbs salvage surgeries for bone tumours and reconstruction surgeries for deformities.

The Centre has a dedicated team for the treatment of spinal ailments in Nanavati Institute of Spine Surgery - Mobilization Solutions and Spinal Fusion procedures, delivered using some of the most advanced techniques and technologies in this field.

Complete Service Offerings

- Joint Replacement
- Minimally Invasive Spine Surgery
- Trauma Care
- Sports Injury Management
- Paediatric Orthopaedic
- Limb Salvage Surgery for Tumours

Centre for Neurosciences

Nanavati Max Hospital Centre for Neurosciences provides comprehensive evaluation and therapeutic services to a wide range of conditions like Stroke, Brain Haemorrhage, Backache, Spinal Disorders, Neuro-Oncology, Epilepsy and other Neurological ailments. The Centre is equipped with advanced neuro-diagnostic services such as EMG, EEG and intra-operative neuromonitoring. It also offers flat panels C-Arm for the evaluation of a multitude of neurological conditions to provide accurate diagnosis and treatment of even the most complex cases. Our Neuro Critical Care Programme manages patients with life-threatening neurological and neurosurgical critical illnesses.

The advanced Neurosurgical Centre offers surgical treatment for a wide variety of ailments such as Stroke, Deep Brain Stimulation, Head Injuries & Trauma, Brain Tumours, Trigeminal Neuralgia Procedures and Aneurysms.

The Minimally Invasive Neuro-spine Surgery Programme is one of the few in the country offering 3D C-arm & Neuro Navigation in Spine Surgery, the most advanced solution to neuro-spine patients. In addition, the Centre offers Minimal Invasive Treatment for disorders like Disc Prolapse, Spinal Tumours, Spinal Fixation and Pituitary Tumours as well.

Heart Institute

The Heart Institute at Nanavati Max Super Speciality Hospital is a unique and dedicated institution of cardiac care, which has achieved a perfect blend of clinical excellence and aesthetic ambience. The department has a team of highly experienced and qualified faculty, providing 24x7 Interventional Cardiac Services, such as radial and femoral coronary angiography, angioplasty, peripheral and neurological interventions, paediatric interventions as well as electrophysiological ablation.

The department routinely performs complex cardiac procedures like Mitral-valvuloplasties, Permanent Pacemaker Implantation, Cardiac Resynchronisation procedures, Automatic Implantable Cardioverter Defibrillator (AICD), Implantation and procedures for congenital ailments such as Coarctation of Aorta, Stenting and Patent Ductus Arteriosus (PDA) closure.

The Centre offers a full range of non-invasive and advanced diagnostic services including Ambulatory Blood Pressure Monitoring (ABPM), Head-Up Table Tilt (HUTT) test, Coronary Computed Tomography Angiography (CCTA) as well as Nuclear Scans for Cardiology.

The division of Cardio-Thoracic and Vascular Surgery is an established centre for Coronary Bypass Surgery (CABG), Valve Replacement, Valve Repair, Transcatheter aortic valve replacement (TAVR), Aortic root and Aneurysm surgeries. Nanavati Max Hospital is amongst the few centres offering Minimal Invasive Bypass surgeries in the region and most cardiac bypass surgeries are total arterial revascularisation, off pump surgeries, making the Centre at par with the best in the world. The department also offers a complete range of diagnostic and therapeutic options, such as Endovascular Revascularization, AV Fistula Construction, Deep Venous Thrombosis (DVT) Treatment, Peripheral Bypass procedures and Peripheral Angioplasty.

Centre for Cancer Care

The Centre for Cancer Care at Nanavati Max Super Speciality Hospital successfully treats the most advanced cancer cases with state-of-the-art technology and a veteran team of multi-disciplinary, surgical, medical, radiation and nuclear Oncologists. Our goal is to deliver the best possible cancer care, in a compassionate environment.

Why choose Nanavati Max Super Speciality Hospital?

Advanced Technology:

Our Cancer Centre focuses on state-of-the-art technologies and innovative treatment methodology which substantially elevates your chances for a cure and organ conservation while minimising side effects.

Our comprehensive range of diagnostic, medical and surgical technology entails:

- Robotics surgery – The da Vinci Xi surgical systems
- Halcyon, latest linear accelerator, Brachytherapy, Simulators
- Breast Cancer Sentinel Lymph Node Biopsy (SLNB)

- HIPEC Technology (Hyperthermic Intraperitoneal Chemotherapy) & Cytoreductive Surgical (CRS) Program
- IMRT, SBRT, IGRT
- Digital Mammography
- PET / CT scan

The Centre offers an advanced Robotic Surgical programme for various Cancers including Head and Neck Cancer, Thorax and Lung Cancer, Thyroid Cancer, Gynaecological Cancer, Gastrointestinal Cancer, Colorectal Cancer, Prostate Cancer, Bladder Cancer, Breast Cancer, Cervical Cancer, Ovarian Cancer.

Centre for Nephrology and Kidney Transplant

Nanavati Max Hospital Centre for Nephrology and Kidney Transplant has a dedicated unit with most the advanced dialysis machines, offering round-the-clock service with the facility for Continuous Renal Replacement Therapy (CRRT) for haemodynamically unstable patients and Continuous Ambulatory Peritoneal Dialysis.

The Centre is equipped with the latest diagnostic and therapeutic facilities like Uroflowmetry, Ultrasound, Doppler, Lithotripsy and Holmium Laser, etc. The centre includes Dialysis Centre, Kidney Transplant, Interventional Nephrology, Paediatric Nephrology Unit, Stone Clinic and has dedicated suites for Endoscopic procedures ensuring quality treatment as well as complete privacy and comfortable surroundings.

Kidney Transplant

The Kidney Transplant programme at Nanavati Max Hospital has become a recognised Centre of Excellence in the region in a very short span of time. Our globally renowned faculty has successfully carried out transplants in clinically difficult and extremely complex cases including Cadaver Transplants, Kidney Transplants in HIV positive patients and patients with high chances of rejection.

Centre for Critical Care

Nanavati Max Hospital Centre for Critical Care

Nanavati Max Super Speciality Hospital has one of the biggest Critical Care units in Western India with 90 beds dedicated to different specialities viz. Medical, Surgical, Cardiac, Paediatric, Neo-Natal, Neurosciences and Organ Transplant. All critical care beds are equipped with cutting edge monitoring systems, ventilators, syringe pumps and infusion pumps.

Facilities of Haemodialysis, Continuous Renal Replacement Therapy (CRRT), Sustained Low-Efficiency Dialysis (SLED), Endoscopy and Bronchoscopy are available by the bedside within the unit. The ICUs are manned round the clock by critical care consultants, dedicated nurses and technicians with specialised training in critical care services.

Centre for Hepato-Pancreatic-Biliary Surgery & Liver Transplant

Centre for Hepato-Pancreatic-Biliary Surgery & Liver Transplant provides patient-centric, comprehensive, state-of-the-art care with compassion to patients with GI, Liver, Biliary and Pancreatic diseases under one roof. It is one of the most advanced centres in Western India with highly qualified and experienced manpower, Physicians and Surgeons, Critical Care Doctors, Interventional Radiologists, Technicians, Nurses, other support staff, all dedicated to Gastroenterology and Hepatology for many decades.

The Centre is equipped with an infrastructure of international standards comprising of dedicated ICU space, well-designed endoscopy lab as per international guidelines, state-of-the-art technology including endoscopes, imaging facilities, critical care monitoring, high-end manometry, GI physiology lab.

The Centre has India's first dedicated Endoscopy Suite for Endoscopic Ultrasound and other Advanced Endoscopic procedures like ERCP, Stenting, UGIE, Colonoscopy, etc. The Endoscopy Suites take special care for the sterilisation and safety of the patients. It has a separate recovery room for twelve patients. These Endoscopy Suites have round-the-clock cover by Anaesthetists and are manned by highly trained technical nursing staff.

Endoscopy set up is fully equipped for all diagnostic and advanced therapeutic procedures linked with pancreaticobiliary diseases, third space Endoscopy, etc. Centre for HPB Surgery & Liver Diseases is an integrated department comprising of Medical, Surgical, ICU and Interventional Radiology teams.

Centre for Obstetrics & Gynaecology

Centre for Obstetrics & Gynaecology at Nanavati Max Super Speciality Hospital is amongst the best in the country with dedicated birthing suites equipped with telemetric foetal monitors to follow the progress of labour and provide a facility for painless delivery. The department has dedicated operating rooms for caesarean section in the same complex.

The department also offers Laparoscopic surgery for removal of the tumours and cysts through key-hole incisions including high-end surgical solutions for management of complex disorders like Double Uterus, Intra-uterine Fibroids and Adhesions, without incision or stitches. Super specialists in the fields of laparoscopic gynaecology and foetal medicine routinely perform intra-uterine foetal procedures, such as Correctional Surgeries and Foetal Reduction.

MR-guided Focused Ultrasound Surgery is a non-invasive, outpatient procedure that uses High-Intensity Focused Ultrasound (HIFU) waves to treat lesions inside the body without surgery. MRgFUS machine consists of a combination of an MRI scanner and HIFU transducer. MRI is able to accurately localise the lesion and guide the HIFU beam that destroys the target tissue safely and accurately. The MRI scanner allows 3D visualisation of the lesion and this allows the doctor to pinpoint, guide and continuously monitor the treatment.

Dept. of General & Minimal Access Surgery

Nanavati Max Hospital's Department of General & Minimal Access Surgery has some of the most renowned surgeons in the region. The hospital is privileged to have consultants with training in laparoscopic surgery from renowned international institutes and exclusive teaching experience from reputed government institutions that are committed to providing ethical and evidence based surgical options to the patients.

The department comprises of specialised units, providing round the clock emergency services and OPD services. The department is equipped with high definition laparoscopic instruments and provides a wide variety of open and laparoscopic procedures for abdominal surgeries related to gall bladder, appendix, spleen and intestines, etc., various types of hernias (inguinal, femoral, umbilical, incisional and hiatus, etc.), and emergency trauma management. Surgeries of Salivary Glands, Thyroid, Adrenal, Breast, Undescended Testes, Hydrocele, Varicocele, Varicose Veins and Anorectal Disorders like Rectal Prolapse, Piles, Fistula, Fissure and Perianal Abscess are also routinely performed.

Centre for Child Health

Centre for Child Health is one of the most comprehensive centres for child care in the entire region and provides excellent care in General Paediatrics, Asthma & Allergy, Adolescent Medicine, Child & Adolescent Psychiatry and Psychology, Developmental Paediatrics, Endocrinology, Gastroenterology, Haematology, Oncology and Orthopaedic. The hospital has a dedicated Paediatric Surgery programme for a wide range of congenital and acquired conditions requiring surgical intervention.

The eleven-bed Neonatal Intensive Care Unit (NICU) unit is equipped with high-end monitors, incubators, high-frequency ventilators and surfactant therapy to deal with any level of medical complications in the newborn. The Centre also has a five-bed Paediatric ICU managed by one of the most experienced teams of highly specialized intensivists in the country.

Robotic Surgery Program

The Da Vinci Xi is the world's most advanced Robotic Surgery Program and is a disruptive innovation in the field of minimally invasive surgery. This technology is specially designed to perform highly sophisticated, multi-quadrant surgery as well as relatively simpler single-quadrant surgery – all while offering a high level of comfort to patients and surgeons alike.

The surgery is performed by an expert surgeon who works from a computer console installed in the operating room. He controls miniaturised instruments mounted on three robotic arms to make tiny incisions on the patient. It entails a shorter hospital stay, thereby decreasing hospitalisation costs considerably. Robotic Surgery also provides the advantage of a faster recovery, enabling patients to return to their normal life sooner.

Benefits for Patients:

- Shorter hospitalisation
- Reduced pain and discomfort
- Faster recovery time and return to normal activities
- Smaller incisions, resulting in reduced risk of infection
- Reduced blood loss and transfusions
- Minimal scarring

Benefits for Surgeons:

- Greater visualisation, Enhanced ability, Greater precision

Accident & Emergency

Accidental & Emergency Centre at Nanavati Max Super Speciality Hospital has separate triage and observation areas. This ensures rapid assessment of patients in line with global principles of triage and leads to efficient management of critical patients. The Emergency area also includes an Operation Theatre dedicated to emergency procedures and an isolation room for the management of infectious patients.

All critical and clinical services including CT, Ultrasound, MRI, X-Ray, Blood Bank, Laboratories and Emergency Transportation are located within the wing, in close proximity. The Department is manned round-the-clock by highly experienced and trained professionals,

supported by the entire range of super speciality services including trauma teams, cardiac units and reconstructive and rehabilitative groups with highly skilled technicians and nurses to ensure shortest turn-around-time for diagnosis and treatment planning for trauma patients, saving those critical moments which can be life-threatening for patients, if not managed well. Nanavati Max Hospital's Emergency is supported by a fleet of well-equipped Advanced Cardiac Life Support Ambulances for the transport of patients. The department also undertakes the transport of critically ill patients via air ambulance.

Centre for Urology

The Centre for Urology at Nanavati Max Super Speciality Hospital is a dedicated, state-of-the-art facility for comprehensive diagnosis and treatment of wide range of adult and paediatric benign and malignant urological conditions.

The centre is well-equipped with cutting-edge equipment and technology to deliver the highest quality of care. We offer all advanced modalities of treatment like non-invasive and minimally invasive procedures for management of urinary system diseases.

Our team of highly experienced experts consists of urologists, andrologists, oncologists, nephrologists, and transplant surgeons who follow a multidisciplinary approach to deliver quality services, at-par with international standards. The centre also has excellent interdepartmental cooperation from the departments of Anaesthesia, Pathology, Cardiology, Radiology, Immunology, and Interventional Radiology.

We offer round the clock inpatient and outpatient, medical and surgical care in all aspects of adult and paediatric urology. The centre provides screening, staging and most up-to-date treatment in the management of urological conditions.

Centre for Plastic, Aesthetic & Reconstructive Surgery

Nanavati Max Hospital's Centre for Plastic, Aesthetic & Reconstructive Surgery is recognised for its vast range of treatments in all disciplines of Plastic Surgery.
The Centre's team of experts are internationally recognised for their pioneering work in Aesthetic (Cosmetic) Surgery, Hair Restoration, Reconstructive, Plastic Surgery, Hand and Microvascular Surgery, Cleft and Craniofacial Surgery.
The Centre has the fine distinction of being the first in the country with specialised tertiary care services available in all sub-disciplines of Plastic Surgery, along with dedicated infrastructure and specialists teams.
The Centre is staffed with Physicians, Nurses, Physiotherapists, Critical Care Specialists and support personnel. Using the most advanced technology and treatment methods, the Centre works in synergy with the common goal of delivering quality care. The staff is well-trained in assisting patients and their families in handling the emotional trauma and thereby enabling them to lead a normal life post-surgery.

Dept. of ENT Surgery

Department of ENT Surgery is the medical speciality that deals with diseases of the Ear, Nose and Throat (ENT) and related areas of the head and neck. ENT specialists play a significant role in treating infections and diseases of ear, nose, or throat and in the management of Benign and Malignant tumours of the head and neck.

Nanavati Max Super Speciality Hospital has facilities to manage all diseases related to ENT and we excel in these Sub Specialities like Otology, Rhinology, Laryngology, Dysphagia, Vertigo Clinic, Snoring & Sleep Apnoea, Paediatric ENT, Skull Base Surgery.

Dept. of Laboratory Medicine (Pathology)

Department of Laboratory Medicine (Pathology) is among the few hospitals in the country to have all laboratories accredited by NABL, corroborating the Hospital's stand to provide the most reliable, accurate and advanced diagnostic services to the patients.

The laboratories are equipped with fully automated equipment seamlessly interfaced with the hospital information system to provide the unique advantage of access to the laboratory reports from any location within the hospital and secured access to authorised individuals from any remote location. The patients also have the facility to view and download their outpatient laboratory reports with real-time online access, thus saving time, money and effort for patients and their relatives.

The team consists of consultants of international repute working together with clinicians to provide comprehensive reporting for a wide range of tests. International accreditation and standardization guidelines are followed to deliver quality and accuracy in results. The services include Biochemistry, Microbiology, Haematology, Histopathology, Serology and Immunology among many others.

Dept. of Radiology

The Department of Radiology offers a single window for all interventional radiology & minimally invasive procedures requiring image guidance. The Department offers all types of vascular and non-vascular interventions and state-of-the-art digital mammography, stereotactic breast biopsy services, high resolution ultrasound & colour doppler services for breast, infertility and vascular disorders. Nanavati Max Hospital's Interventional Radiology department is one amongst a handful of centres in the country to provide Advanced Endovascular procedures.

The 32-channel wide bore, short tunnel, whole body 3 Tesla MRI Scanner with MRgFUS for treatment of fibroids, bone metastasis and severe facet arthropathy, 3D and 4D Ultrasound, Colour Doppler, Digital Mammography and Whole Body Densitometry with paediatric software is the only such machine in India. The department is equipped with a 64-slice cardiac capable PET-CT Scanner (Biograph mCT-Molecular CT). All imaging systems are linked through Picture Archiving and Communication System (PACS) ensuring excellent viewing quality for accurate reporting. A complete cardiac CT scan can be performed in less than five seconds.

Dept. of Physiotherapy & Rehabilitation

The Department of Physiotherapy & Rehabilitation at Nanavati Max Super Speciality Hospital helps patients in remediation of impairments and disabilities, and the promotion of mobility, functional ability, quality of life and movement potential through examination, evaluation and physical intervention. The department is managed by specially trained and experienced physiotherapists, and is well equipped to handle all kinds of rehabilitation processes including conditions such as stroke, vestibular injuries, spinal cord injuries, cerebral palsy and post joint replacement rehabilitation. The department's capabilities include special physiotherapy skills for Musculoskeletal, Cardio-Respiratory, Neurological, Geriatrics & Women's Health issues, and Sports & Hand Surgery physiotherapy to provide support for healthy and early mobility.

The Centre is one amongst a handful in the country to offer Bio Feedback therapy for patients seeking recovery from stroke and spinal injuries. A dedicated paediatric section looks after the rehabilitative needs of children suffering from Autism, Cerebral Palsy and Attention Deficit Hyperactivity Disorder (ADHD).

Dept. of Internal Medicine

The Department of Internal Medicine provides a holistic approach to management of various disorders like Diabetes, Cardiac conditions, Obesity, High Blood Pressure and Vascular Diseases. In addition, the Department plays a pivotal role in providing need-based care by optimal utilisation of all medical and surgical super specialities in the comprehensive management of patients.

Well-equipped with state-of-the-art infrastructure and ultra-modern ICUs to deal with all kinds of medical conditions, the Department strives to offer various Internal Medicine related clinical services with patient-centric approach involving various super speciality team members

Dept. of Anaesthesiology and Pain Management

The Department of Anaesthesiology and Pain Management at Nanavati Max Super Speciality Hospital is equipped with the latest anaesthesia and haemodynamic monitoring systems. It offers expert preoperative evaluation, post-operative care, pain relief for chronic diseases and painless labour. The Department also provides advanced anaesthesiology services for Cardiothoracic and Vascular Surgery, Organ Transplant, Joint Replacement and Onco-Surgery.

Dept. of Respiratory Medicine, Allergy and Sleep Disorders

The Department of Respiratory Medicine, Allergy and Sleep Disorders is one of the most comprehensive units dealing with an entire range of respiratory conditions including asthma and allergic diseases, Chronic Obstructive Pulmonary Disease (COPD), lung infections including tuberculosis, interstitial lung diseases, pulmonary hypertension, sleep-disordered breathing and lung malignancies. The department is committed to delivering outstanding best practice clinical care, outcome driven professional education and community outreach as well as translational research of international acclaim.

Dept. of Transfusion Medicine

The Department of Transfusion Medicine at Nanavati Max Super Speciality Hospital has adopted best practices in blood transfusion services. The Department provides safe leuko-depleted, micro-particle ELISA and CMIA tested blood. The Blood Bank is equipped with a Nucleic Acid Testing (NAT) facility ensuring the safety of blood meant for transfusion. Blood utilisation is optimised by separating blood into its various components like red cell concentrate, platelet concentrate, fresh frozen plasma and cryo-precipitate. The aim of the department is to promote the use of various components to ensure optimum utilisation of blood and also to ensure that the patient receives the safest possible blood by testing for various markers.

Other services offered by the Department include Apheresis, Plasmapheresis, and Leukapheresis and Peripheral Stem Cell Harvest. The Immune-Haematology lab is a valuable resource for routine needs.

Dept. of Telemedicine

Department of Telemedicine at Nanavati Max Super Specialty Hospital, Mumbai – India has been delivering tele-consultation services to patients from various parts of the country, Internationally to PAN African Countries and various other international patients from Non-African Countries since August 2006.

Latest telemedicine software, tele-consultation app, digital point of care medical devices and remote monitoring has been implemented and adopted as practice by more than 100 Consultants at Nanavati Max Hospital.

So far Telemedicine Department has provided tele-consultation services to more than 60,000 patients in the last decade. In the FY 2019-20, the department has delivered more than 35,000 tele-consultations with constant support of more than 100 Consultants across 30 super specialities. At present dept. provides on an average 3000 tele-consultations per month.

Govt. of Maharashtra National Rural Health Mission - recognised Telemedicine Dept. of Nanavati Max Hospital in July 2006 as a nodal centre to provide specialist doctor's tele – consultation to the 15 District and Sub-district hospitals in the entire State of Maharashtra.

In August 2009, Dr. Balabhai Nanavati Hospital became part of the prestigious project "The PAN African E – Network Initiative of Ministry of External Affairs (Govt. of India)" managed by Telecommunication Consultants of India Ltd (TCIL) and has delivered more than 750 hours of international Tele-CME's (continuous medical education programmes) across 12 specialities which are approx. 1000 CME lectures via teleconference on various clinical topics which has benefitted more than 7000 doctors and paramedics, nurses in African Sub Continent. CME's were delivered in English and French language.

Dept. of Dental Surgery & Implantology

The Department of Dental Surgery & Implantology offers comprehensive dental services like dental implants, all ceramic veneers & crowns, precious metal crowns, flexible valplast dentures, dental sealants, gum disease treatment, bone grafting, periodontics and prosthodontics.

Dept. of Ophthalmology

The Department of Ophthalmology at Nanavati Max strives to offer the best to its patients and has been at the forefront of delivering specialized eye care services for various disorders. The department extends its services to all ophthalmic modalities including Refractive procedures (vision correction procedures), Cataract, Glaucoma, Vitreo Retinal services, Uvea, Cornea, Squint, Paediatric Ophthalmology, Neuro-Ophthalmology, Oculoplasty and Tumours, Opticals and Vision Aids, Contact Lens and Comprehensive Eye Check-up.

Preventive Health Check

Preventive Health Check-up packages at Nanavati Max Super Speciality Hospital comprises of a complete set of tests and are designed keeping in mind the disease risk profile, which varies with age, gender and lifestyle patterns and cover every aspect of various health needs.

The Preventive Health Check-up lounge offers end-to-end care for individuals from initial consultation, selection of relevant package to scheduling the appointment, co-ordination with clinical experts and report collection. Specific focus is laid on the ambience and environment within the facility to make individuals feel healthy and positive throughout their visit to the hospital. A specific set of health check-up packages has been designed keeping in mind the lifestyle of corporate employees as well. The hospital offers focused screening packages for a multitude of lifestyle related ailments and chronic diseases.

International Patient Services

Since its inception, Nanavati Max Super Speciality Hospital has been a preferred destination for International Patient Services seeking specialised healthcare services in India. The Hospital has attended to the healthcare needs of thousands of global citizens from the Middle East, Africa, Europe, South East, Central Asia, Pacific Islands and North America.

The Hospital is very conveniently located within a 30 minutes drive from the international airport and next to a well known Metro Station in Mumbai, allowing patients and their attendants an ease of access and local commute during their stay in India.

There is a dedicated lounge for international patients with facilities for communication assistance with physicians, family and friends at home, via free internet access. The Hospital has a team of in-house interpreters trained in multiple languages who assist the patients throughout their visit to Nanavati Max Super Speciality Hospital.

The Hospital offers personalised services to overseas patients including query handling, identifying physicians in advance to meet the patients' specific needs, coordination for Doctor's appointment and surgery, VISA and FRRO assistance, airport pick-up and drop facility, currency exchange facilitation, mobile and calling card arrangements, organising accommodation for the attendants and patients' families within the vicinity of the Hospital, cuisine of the patient's choice, travel, tour & ticketing assistance, and post-discharge follow-up.

Nanavati Max Super Speciality Hospital has a dedicated team for International Patient Services. This well-trained team takes care of all clinical and administrative requirements of patients and their companions coming from overseas. A personal coordinator/case manager is assigned to each patient and is responsible for taking care of all aspects of patients' visit to India, ensuring that they feel at home at Nanavati Max Hospital. The services are focused on meeting the special needs of the patients and their families, before, during, and after their visit.
